

TECHNICAL DATA SHEET

Type of coating PA - POLYESTER POWDER COATINGS

Color RAL 6028

Symbol PA114/0/5180/27

Surface Smooth

Gloss level Matt

Characteristics - Outdoor, industrial application

- Very good weather and UV resistance

Very good chalking resistance
Very good covering power
Decorative and protective effect
Very good mechanical resistance

Applications Agricultural machinery, furniture and garden tools, machine casings, mailboxes, etc.

Powder properties Particle size (Malvern) Fine powder suitable for electrostatic spray (corona) and tribocharging (tribo).

Density (g/cmł) 1,589 ISO 8130-2

Theoretical coverage (m,/kg) ~9 by the film thickness 70 μm and 100 % use of powder coating.

Storage stability 24 months from the date of production, in the orginal, unopened package, keep away from heat sources, in the temperature of $5 - 25^{\circ}$ C, protect from moisture. No

direct sun exposure. The product should be stay at ambient temperature (paint

shop) 12h before use.

Version: 1.0 Date of version: 24.11.2020

 Coating film
 Thickness
 recommended 70-90μm - max. 120μm

 tested in lab conditions on:
 ISO 2808

steel panel

Gloss (60°) 25 ±5 GU

ISO 2813¹ VISUAL²

Cross cut 0

ISO 2409

Mandrel bending <5 mm

ISO 1519

Erichsen cupping >5 mm

ISO 1520

Impact resistancefront>50 kg/cmISO 6272-1reverse>50 kg/cm

Buchholz hardness >80

ISO 2815³

Pencil hardness 3H

ISO 151843

(1) applies to smooth and no metallic coatings film (2) applies to structural and metallic coatings film

(2) applies to structural and metallic coatings film (3) not applicable structural coatings film

TECHNICAL DATA SHEET

may occur (typical for powder coatings). - Various application parameters may cause color/effect changes Proper grounding of application equipment and coated elements helps to keep repeatability of the obtained color/effect It is recommended to do the entire order on the same equipment, with the same application parameters - Not be mixed with other powder coatings Control the air speed during application of powder coatings Keep the appropriate distance: the gun - coated elements Keep a uniform thickness of coating. - Curing conditions - Curing time recommendation in a convection oven: 180°C/10min. 170°C/15min (object temperature) - Must be strictly observed parameters of stoving the coating film to ensure that the full mechanical and chemical properties Suitability of the product for stoving in gas ovens and radiant ovens should be verified - may be a significant difference in color - perform a comparative test with the standard color (please contact us for details). Approvals - The powder coatings are in compliance with 2011/65/EC and 2015/863/EC (so called ROHS) Heavy metal and TGiC free. - In the case of cleaning powder coated surfaces it is necessary strict compliance with the Technical recommendation on: Cleaning of powder coated surfaces. - To print, to glue, to label, to laminate with foil, over-coating or any other post-treatment, some preliminary testing is recommended Powder-coated details should be packaged after being completely cooled down to ambient temperature, into appropriate packaging materials previously tested by the user Packaged details should be stored under cover to avoid condensation, which may result in traces on the finished		
- Application parameters depend on the geometric shapes of the detail and the film thickness to be reached Responsibility for the correct application parameters lies on the coating applicators Despite careful production methods, slight deviation of color and effect between the different manufacturing batch may occur (typical for powder coatings) Various application parameters may cause color/effect changes Proper grounding of application equipment and coated elements helps to keep repeatability of the obtained color/effect It is recommended to do the entire order on the same equipment, with the same application parameters - Not be mixed with other powder coatings Control the air speed during application of powder coatings Keep the appropriate distance: the gun - coated elements Keep a uniform thickness of coating. - Curing conditions - Curing time recommendation in a convection oven: 180°C/10min. 170°C/15min. (object temperature) - Must be strictly observed parameters of stoving the coating film to ensure that the full mechanical and chemical properties Suitability of the product for stoving in gas ovens and radiant ovens should be verified - may be a significant difference in color - perform a comparative test with the standard color (please contact us for details). Approvals - The powder coatings are in compliance with 2011/65/EC and 2015/863/EC (so called ROHS) Heavy metal and TGiC free. Technical - In the case of cleaning powder coated surfaces it is necessary strict compliance with the Technical recommendations - To print, to glue, to label, to laminate with foil, over-coating or any other post-treatment, some preliminary testing is recommended Powder-coated details should be packaged after being completely cooled down to ambient temperature, into appropriate packaging materials previously tested by the user Packaged details should be stored under cover to avoid condensation, which may result in traces on the finished		 Surfaces must be dry, degreased and free from rust and other contaminants. In order to improve coating adhesion to the surface and improve resistance it is recommended: aluminium - chromating, chrome-free pretreatment or anodic pretreatment. steel and galvanized steel - individual choice of surface pretreatment (e.g. phosphating). However, in order to achieve optimum results, you must follow the instructions and recommendations of the
180°C/10min. 170°C/15min. (object temperature) - Must be strictly observed parameters of stoving the coating film to ensure that the full mechanical and chemical properties. - Suitability of the product for stoving in gas ovens and radiant ovens should be verified - may be a significant difference in color - perform a comparative test with the standard color (please contact us for details). Approvals - The powder coatings are in compliance with 2011/65/EC and 2015/863/EC (so called ROHS). - Heavy metal and TGiC free. Technical recommendations - In the case of cleaning powder coated surfaces it is necessary strict compliance with the Technical recommendation: 01: Cleaning of powder coated surfaces. Comments - To print, to glue, to label, to laminate with foil, over-coating or any other post-treatment, some preliminary testing is recommended. - Powder-coated details should be packaged after being completely cooled down to ambient temperature, into appropriate packaging materials previously tested by the user. - Packaged details should be stored under cover to avoid condensation, which may result in traces on the finished	Application	 Application parameters depend on the geometric shapes of the detail and the film thickness to be reached. Responsibility for the correct application parameters lies on the coating applicators. Despite careful production methods, slight deviation of color and effect between the different manufacturing batches may occur (typical for powder coatings). Various application parameters may cause color/effect changes. Proper grounding of application equipment and coated elements helps to keep repeatability of the obtained color/effect. It is recommended to do the entire order on the same equipment, with the same application parameters Not be mixed with other powder coatings. Control the air speed during application of powder coatings. Keep the appropriate distance: the gun - coated elements.

Safety Data Sheet POLYESTER POWDER COATINGS PA, PA/FP - TI	Safety Data Sheet	POLYESTER POWDER COATINGS PA, PA/FP - TI
Edition / date 1.1 / 2025-04-18	Edition / date	1.1 / 2025-04-18

The above values may vary depending on the type of surface pretreament, color, gloss, texture, etc.

All informations included in this card are based on our experience and actual knowlegde and do not release the user from carrying out their own tests. If in doubt please contact us for details. Having no influence on the use and application conditions, we can take responsibility only for the quality of any the product and ensure that it fits to our standards. This Technical Data Sheet is revised periodically. EKO-COLOR reserves the right to change specifications without notice.

If necessary, our sales department will confirm the validity of this document.
